“This is a site about education during the 20th century, organized by decades. It includes short descriptions of 'educational episodes' that took place in that period. The episode in question could be a policy, a court case, a piece of legislation, a scholarly article, a new theory, a research report, an incident, the release of a book, a speech, an empirical finding, a conference, the opening or a closure of an institution, a movie, an anecdote, or anything, big or small, that tells us something about education theory, policy, politics, research or practice during the last century.”
