

TEACHING ARTIST: Theory and Methods, LA 301
 Instructor: Lynda Monick-Isenberg
Due Tuesday, September 18.

Material Research: a phantom **Photography** project.

Background Information: Your phantom project is a 6 hour arts integrated lesson in photography for 25, 7th grade students exploring comforting places. You have been asked to help the students create a web gallery of their digital work and matted digital printouts for an exhibition in the student gallery. Assume that the teacher has # 2 pencils, lined paper, a digital camera with enough memory, and appropriate computers and software available.

Assignment Objective: Your assignment is to choose and list specific materials, brands, place of purchase, amounts, sizes, and prices of materials that are necessary for implementing this project. Your budgetary goal is to spend no more than \$3 per students or a total of \$75.

DO NOT GO OUT AND BUY THESE MATERIALS. You are doing the *research* for the materials purchases. First, decide on the *all* materials and sizes you will need to successfully implement the project to create a shopping list. Use the phone, the internet, and store visits to find and compare materials, brands, and costs. Choose item, brands, amounts, sizes of containers, and price for each item and list below. List even if materials are free. Finally, tally your costs. Continue on back if needed.

Item / Brand	Place of Purchase	Amounts	Size	Price	
				Total Cost	
				Cost per student
